MAVE · UI KIT · v0.1 · DESKTOP 1920

M A V E

Foundations, components and specs for the renderer in `apps/desktop`.
Every value maps to a token in `handoff/tailwind.config.js`.
องค์ประกอบ ค่าสี ตัวอักษร และระยะ สำหรับนำไปเขียนโค้ดจริง

Open prototype → `handoff/ · tailwind.config.js · mave.css · HANDOFF.md`

01 Color สี

Name	Token	Value	Use
Background	`mave-bg`	#05060D	App canvas
Surface	`mave-surface`	rgba(12,14,30,0.60)	Glass fill under gradient
Raised	`mave-raised`	rgba(255,255,255,0.035)	Inset blocks
Line	`mave-line`	rgba(255,255,255,0.08)	Hairlines, dividers
Edge	`mave-edge`	rgba(180,190,255,0.14)	Glass border
Ink	`mave-ink`	#EEF0FB	Primary text
Dim	`mave-dim`	rgba(222,226,255,0.60)	Secondary text, user lines
Faint	`mave-faint`	rgba(222,226,255,0.38)	Labels, meta, waiting
Blue	`mave-blue`	#5B84FF	Primary, selection
Violet	`mave-violet`	#9A72FF	Ambient only
Cyan	`mave-cyan`	#5FD2FF	Live, MAVE acting
OK	`mave-ok`	#5FE0A8	Done, passed, sent
Error	`mave-err`	#FF7A85	Failed, removed
Warn	`mave-warn`	#FFC46B	Needs approval

Rules — cyan means **live / MAVE is acting**; blue means **selected or primary**; violet is ambient only, never text. Status colors appear only on status (a dot, a chip, a diff), never as large fills. Text is always ink, dim or faint — no colored body copy.

SURFACES

Glass `.mave-glass`

Inner `.mave-inner`

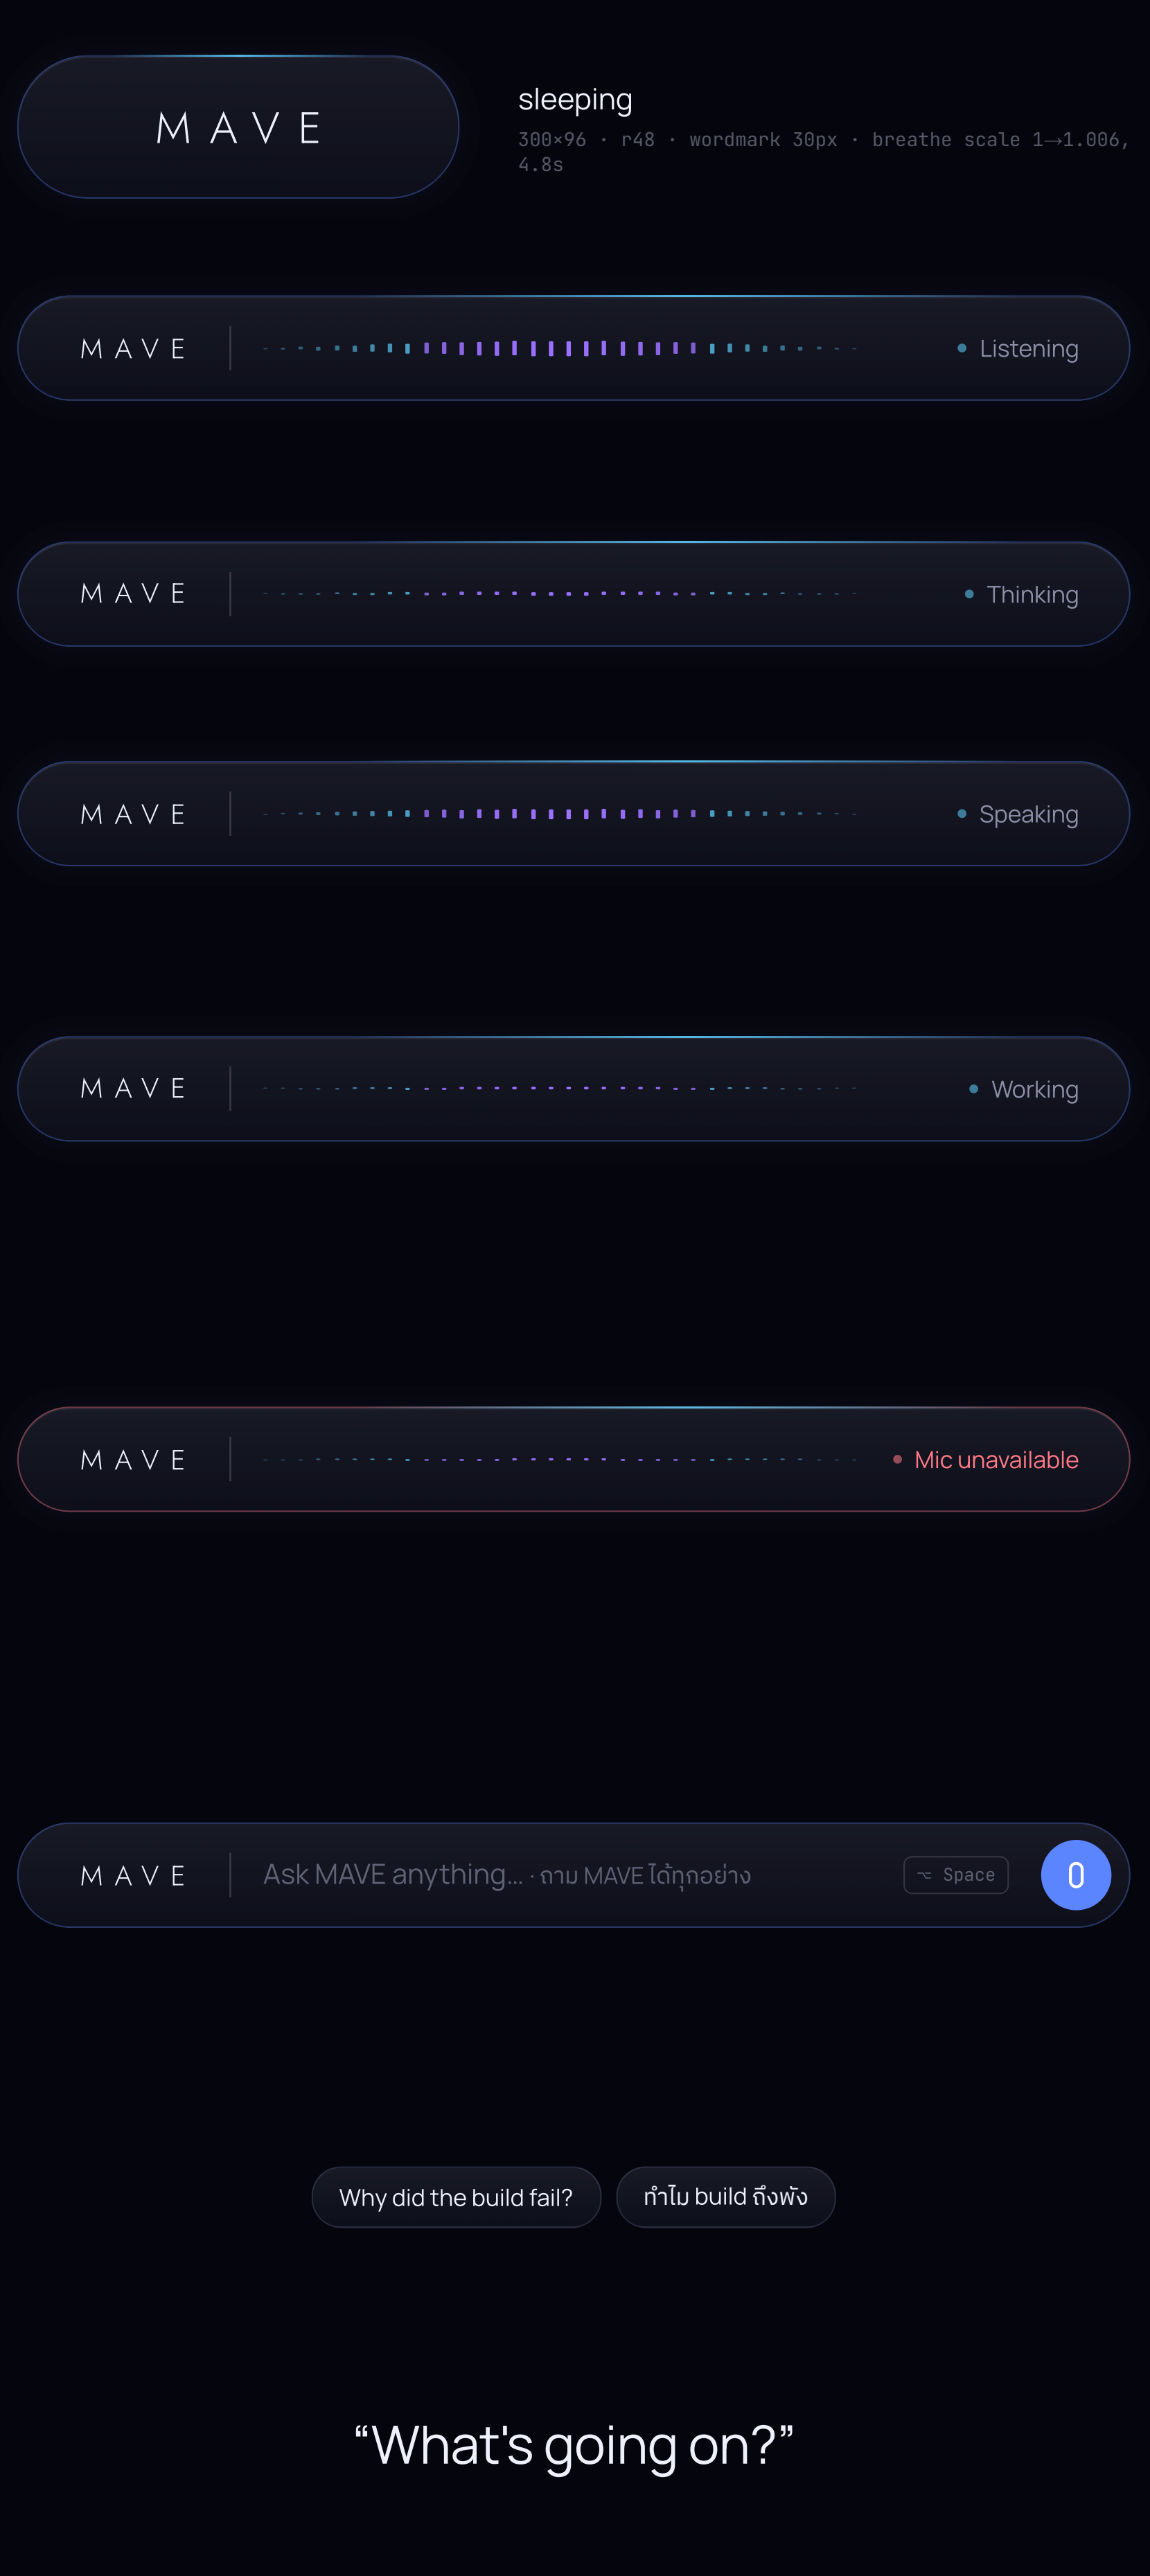
Active `border-mave-blue/55` `shadow-active`

MOTION

Name	Curve	Use
`enter`	`cubic-bezier(.25,1,.5,1) · 450ms`	Things arriving: cards, rows, words (y +10→0)
`glide`	`cubic-bezier(.65,0,.35,1) · 800ms`	Surfaces morphing: pill, thread dock, panel → indicator
`pop`	`cubic-bezier(.34,1.56,.64,1) · 450ms`	A value changes in place: 18:00 → 19:00
`spring`	`framer-motion { stiffness: 260, damping: 30 }`	Drag / resize of the floating panel

04 MAVE bar แถบ MAVE · Orb / Mini Surface

The one persistent element. Sleeping: centered wordmark 300×96. Any wake (voice, hotkey, click) morphs it to the bottom bar 760×72 — the wordmark slides left, divider + waveform + status fade in (glide 800ms). States map 1:1 to `AssistantStateSnapshot.state`.



sleeping

Why did the build fail?

● MAVE

The latest navigation change introduced two TypeScript errors.

การแก้ไข navigation ล่าสุดทำให้เกิด TypeScript error 2 จุด

`navigation.tsx` · Build logs · 2 errors

No bubbles. User 24 dim · MAVE 26 ink · 34px between messages · words fade in 35ms stagger · centered 760w in chat, docked 420w left in tool modes · top mask 160px

CONTEXT CHIP · glance

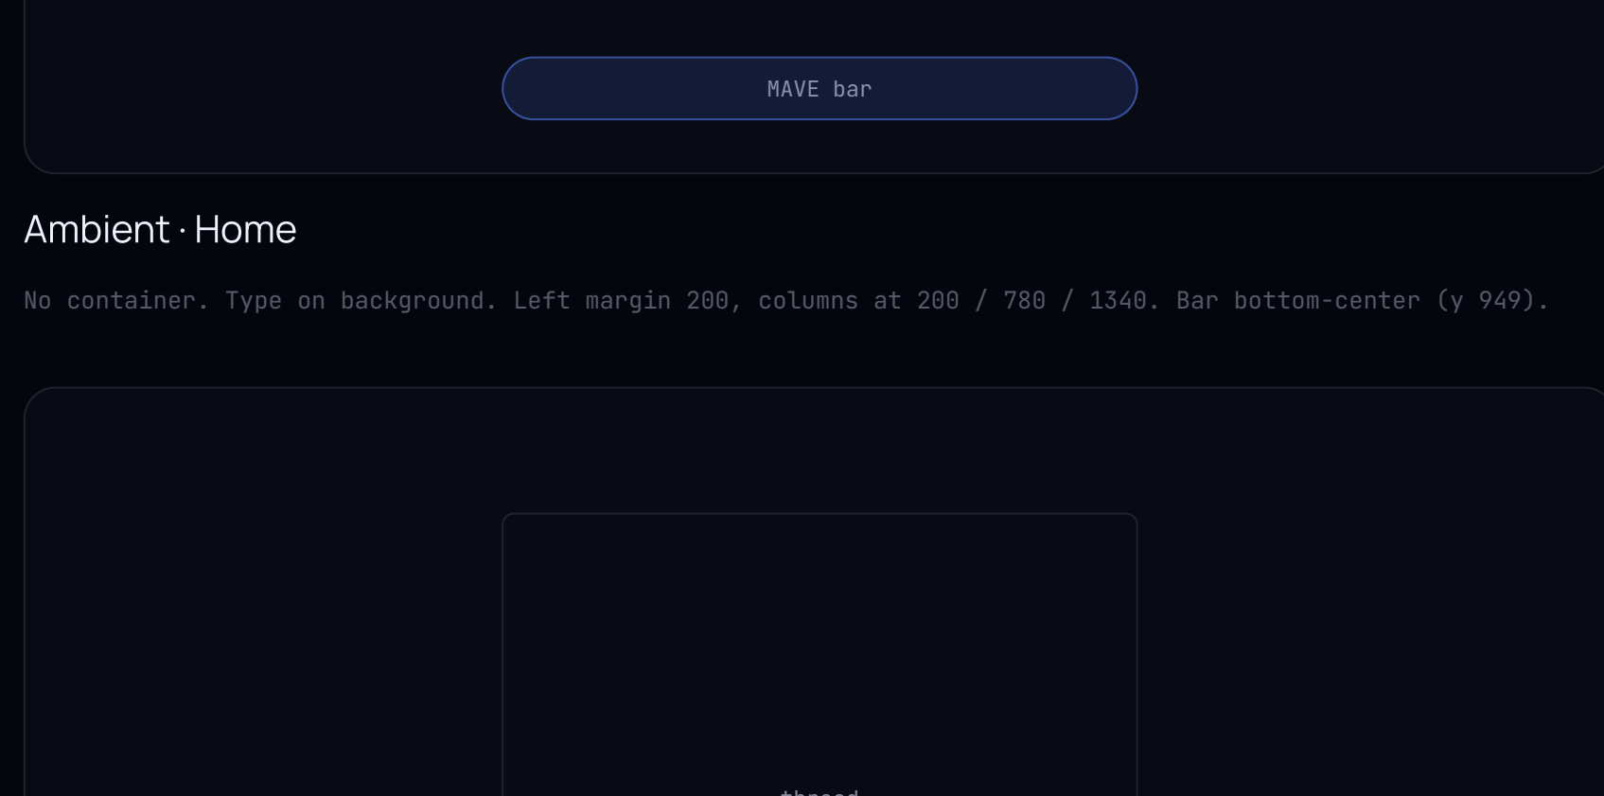
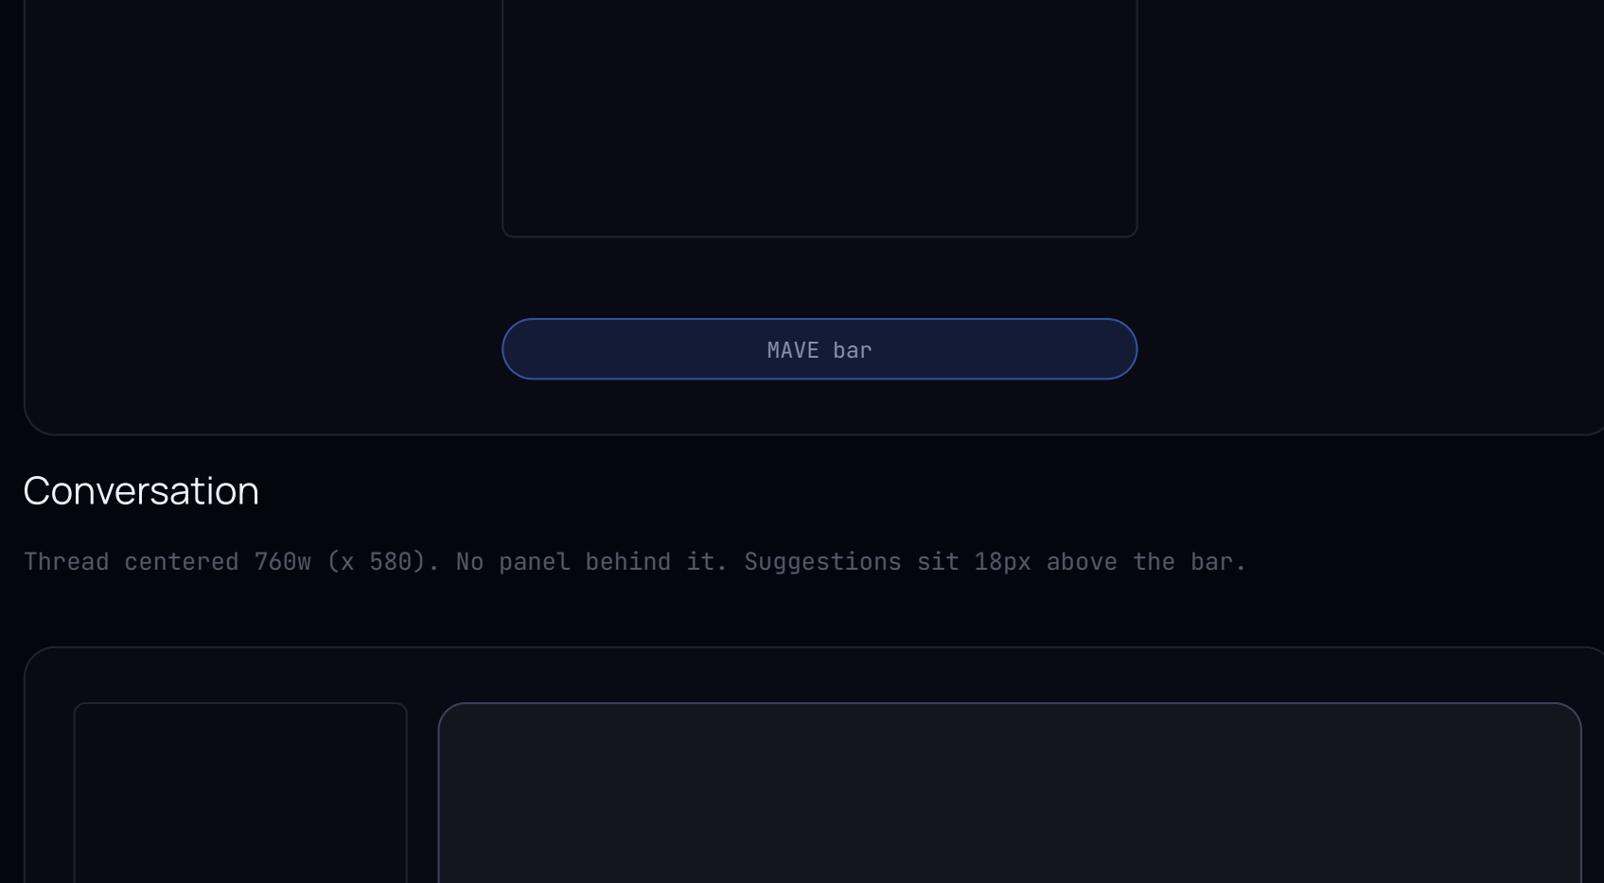
+
-

06 Layout · 1920 × 1080 โครงหน้าจอ



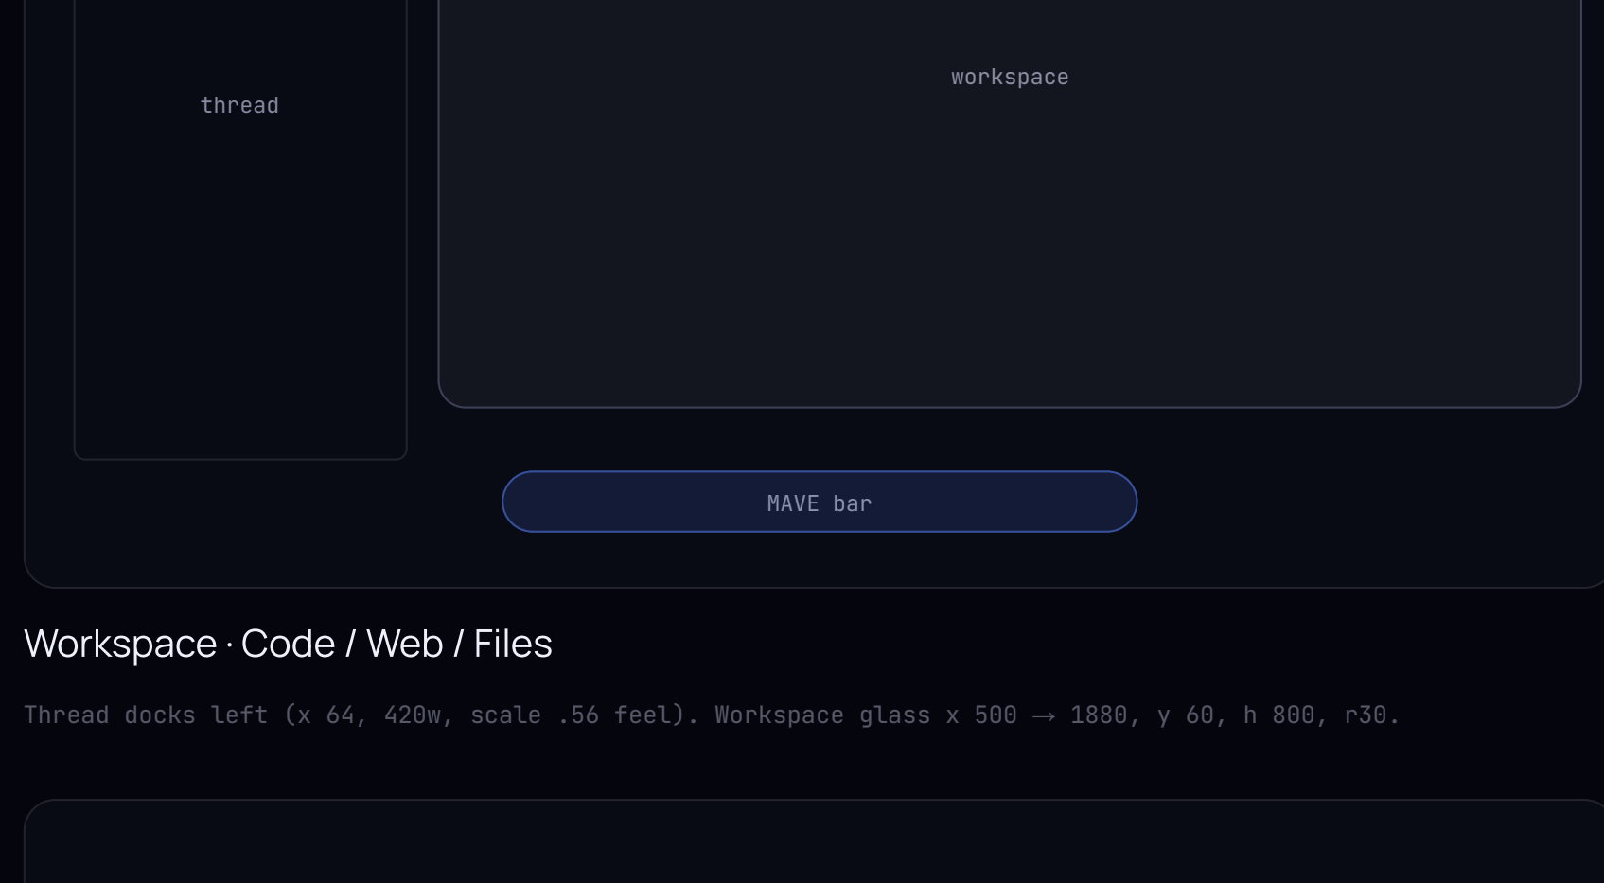
Ambient · Home

No container. Type on background. Left margin 200, columns at 200 / 780 / 1340. Bar bottom-center (y 949).



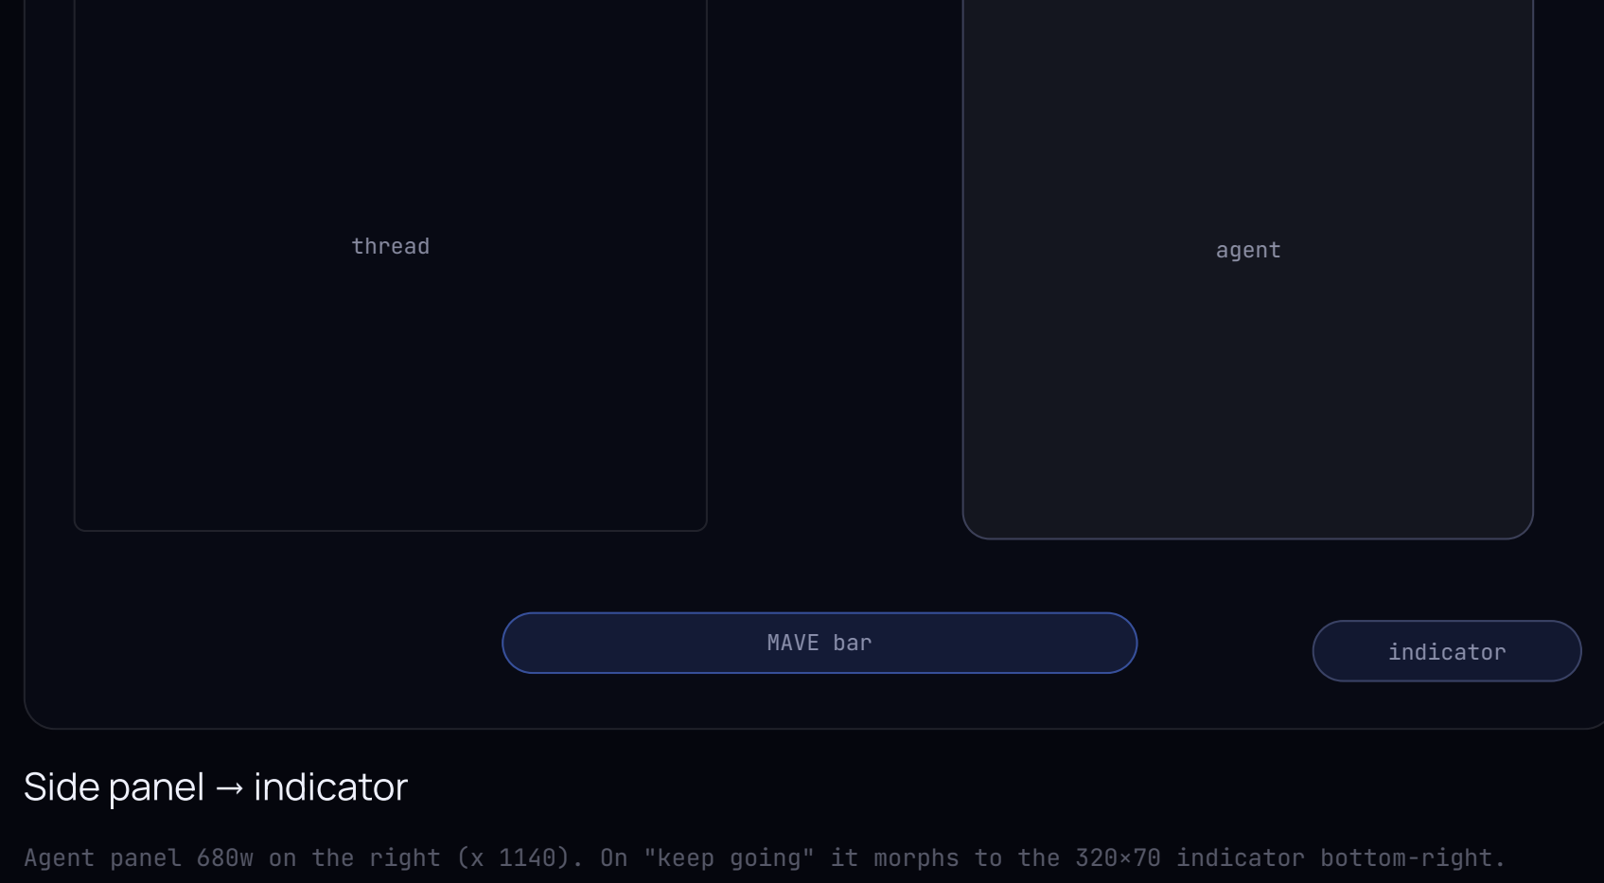
Conversation

Thread centered 760w (x 580). No panel behind it. Suggestions sit 18px above the bar.



Workspace · Code / Web / Files

Thread docks left (x 64, 420w, scale .56 feel). Workspace glass x 500 → 1880, y 60, h 800, r30.



Side panel → indicator

Agent panel 680w on the right (x 1140). On "keep going" it morphs to the 320×70 indicator bottom-right.
